

**GBS****Heavy Duty Clamps - Trunnion Clamps****1 Bolt**

- New specially designed bolt with integrated spacer and improved performance. The W5 version has a socket head cap bolt

**2 Reinforced band loops**

- ability to withstand much higher torques

**3 Mechanically locked closure**

- no welding spots and no contact corrosion

**4 Bridge**

- hose protection

**5 Robust band with rounded edges**

- prevents injuries and damage to hoses

**6 Hollow trunnions**

- reduces the tensile forces on the bolt and the mechanical lock

**Heavy-duty clamps for multiple applications**

NORMACLAMP® GBS is designed primarily for use in applications where hose clamps must meet stringent requirements. In particular if suction and pressure hoses - complete with plastic or steel inserts and high shore hardness values - are to be connected and attached. They are therefore particularly suitable for use on commercial and special vehicles.

Their standout feature is the exceptionally high levels of band tensile force they demonstrate. NORMACLAMP® GBS clamps are also extremely easy to install, whether you're using manual, pneumatic or electrical standard tools.

**Advantages at a glance**

- Failure torques improved by a factor of two
- Band tensile force levels improved by a factor of three

**Applications**

- Machine building
- Chemical industry
- Irrigation systems
- Ship manufacturing
- Railway industry
- Agricultural machines
- Building machines
- Engine manufacturing
- Pump and filter
- Mining Industry

**Materials**

W1	W2	W3	W4	W5
x	x		x	x

Material	Corrosion resistance in salt spray testing
W1	Min. 72 h
W2	Min. 72 h
W4	Min. 240 h

These diameters are full trunnions and do not feature a mechanically locked closure, but are instead spot-welded.
